

T3 | ELECTRIC CARGO VAN

BYD T3 is a pure electric logistics vehicle with low energy consumption and high performance. Its pure electric drive, powerful electric motor, and automatic shift, make it an easy vehicle to operate and maintain. Powered by BYD's propriety Blade Battery with a capacity of 44.9kWh, this silent-running van can run 300km with zero emissions on one single charge. With a 3.8m³ cargo space and 0.8 ton payload, BYD T3 meets the transportation needs of most urban logistics systems.

Blade Battery

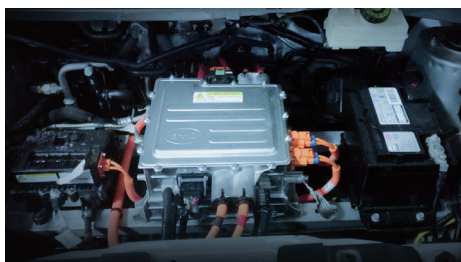

World's Most Advanced Battery Technology

The BYD Blade Battery offers superb hot and cold weather performance, fast charging, long lifecycle, and the highest levels of safety in the industry.

Large storage

T3 has a large space of 3.8 cubic meters, creating a flexible storage for multiple uses.

World Leading Efficiency

BYD's world leading automotive electronic control module provides intelligent management and maintenance, further improving efficiency, safety and reliability.

Safety First

The T3 is equipped with reverse camera and seat belt reminders, designed to improve safety for you, and your passengers.

Specs updated: Aug.2021

① Actual range will vary depending upon driving/charging habits, speed, conditions, weather, temperature, and battery age. The battery capacity is initial capacity. It will decrease with time and use. The battery age and outside ambient temperature both play a role in charging times.

② The above specifications are for the standard vehicle, they are subject to regional needs and regulations. Some vehicles shown include optional equipment that may not be available in all regions. All technical specifications are subject to change without notice. Visit BYD dealer for more details.

③ BYD reminds you to wear seat belts, secure children in the rear seat, obey all traffic laws and drive responsibly.
